

Adaptations

Thursday, December 28, 2017

Fish are very unique. During the Adaptations Day Camp, campers will not only learn about what makes each fish different and why, but they will also use that new knowledge to improve their chances of catching a specific target fish. Campers will also explore inner workings of a fish by doing a fish dissection!

Daily Activities
Welcome & Introduction
Casting Challenge & Knot Tying
Fishing Safety/Baiting (Snack)
